- ➔ Lifelong Learner

CERTIFICATION

LEVEL 1 FIRST AID

2023-2026
Overhang Training Centre

ABOUT ME

I'm David, an aspiring software engineer with a passion for building innovative apps and systems. I am constantly honing my skills and working on exciting projects like a JavaScript-based code editor and an app for kids on the spectrum.

Furthermore, I combine creativity with tech, offering video editing and graphic design services while expanding my knowledge in tools like React.js and JSX. Outside of work, I'm passionate about basketball, fitness, and basic car maintenance.

Whether I'm developing an app, crafting a design, or tackling a new challenge, I bring dedication, curiosity, and a drive to make a difference in everything I do.

WORK EXPERIENCE

STOCKING ASSOCIATE

Walmart (2022-2024)

During my two years as a stocking associate at Walmart, I gained valuable experience in maintaining an organized and efficient retail environment. My primary responsibilities included unloading deliveries, restocking shelves, and ensuring inventory accuracy.

I worked closely with my team to ensure that products were displayed neatly and in the correct locations, making it easier for customers to find what they needed.

This role required me to be detail-oriented, as I had to track stock levels and replenish items promptly to meet store standards and customer expectations.
